

No-Till Corn Production Field Day
Wednesday
September 21, 2005
10:00 AM – NOON

UC Davis
Department of Plant Sciences Vegetable Crops Field Facility
Hutchison Blvd (about a half mile west of HWY 113)

An informal viewing and discussion opportunity will be held on Wednesday, September 21, from 10 o'clock in the morning through noon, at the Vegetable Crops Field Facility about a half mile west of HWY 113 on Hutchison Blvd for anyone interested in viewing no-till corn prior to harvest as part of a campus study of various conservation tillage with and without winter cover crop systems. The study is now in its fourth year of continuous CT production through a tomato/corn rotation. Planting equipment will be on site for examination and UCD researchers will discuss implementation and initial findings from this study.

UC Vegetable Crop Specialist Jeff Mitchell is the principal holding the meeting. Please respond to UCD Veg Crops field superintendent Jim Jackson at (530) 681-2279 for further information.
